

Monitor your entire fleet without ever having to leave your office. See the road and your drivers in real-time, automatically capture clips of aggressive driving events, download historical video and improve behavior with an integrated driver coaching system.

Live Streaming

Check in on your drivers and the road around them with flawless live streaming views from durable, HD cameras.

Event-Based Notifications

When unsafe driving events are detected, FleetCam® saves a clip from all camera angles for you to review and use for driver coaching.

Stream Video History

All your recorded video clips can be accessed remotely so you can stream and download them to your computer without having to physically access the vehicle.

Breadcrumb Trail Snapshots

Helpful video snapshots are captured every 5 minutes and displayed along the vehicle's route, helping you choose the moments you want to stream.

FleetCam® Essential

Up to 2 Cameras • Windshield Mounted

FleetCam® Essential is an affordable camera solution that gives you everything you need to see the driver and the road ahead, record and analyze driving behavior, and help assess liability.

- Durable HD cameras with flawless streaming views
- Weatherproof exterior cameras available
- Infrared sensors included for night vision
- Triggered events automatically recorded and uploaded
- Delayed recording shutdown keeps rolling after a vehicle is turned off
- Event notifications sent directly to your phone

FleetCam® Enterprise

Up to 5 Cameras • Redundant Storage + Everything in Essential

FleetCam® Enterprise is the video monitoring solution from the future. Get a 360° view of your vehicle with up to 5 cameras with customizable angles.

- Customize camera setups to meet your monitoring needs, like installing a camera on a towing crane or inside a box
- All videos are stored in standard and high-definition so you can save time by quickly downloading SD videos when HD is not necessary.
- Videos can be automatically backed up onto dual storages, ensuring you never lose important video clips.

Optional LCD Screens for Drivers

Reduce liability and improve driver visibility with 360-degree live views in and around the vehicle.

- Optional LCD screens show the drivers camera views in and around their vehicles.
- Drivers can use the LCD screens as back-up cameras with the proper camera setup.
- Drivers can utilize the LCD screen to livestream the vehicle's video feeds; giving them a full view of their vehicle and what is around it.
- Drivers can use LCD screens to monitor inside box trucks, cranes, and other special vehicle apparatuses in real-time.
