

# FTS Fleet Management

Forward Thinking Systems allows you to monitor your entire fleet without leaving the office. See the road and your drivers in real-time, automatically capture clips of potentially hazardous events, download historical video, and improve behavior with an integrated driver coaching system.

## Transportation & Logistics

Create routes, organize schedules, monitor driving patterns. Map out your entire operation right from your desktop.

## Construction & Utilities

Build a blueprint for success with fleet management solutions that help keep sites safe, compliant, and profitable.

## First Response

Reliable routes and alerts that respond as quickly as you do so you're prepared to handle whatever comes your way.

## Service Industry

Leave paper tickets and whiteboards behind. Provide proof of service and electronic signature capture, and keep your office and technicians in sync.

## Intellihub® - Fleet Tracking & Management

Location, activity, maintenance, and more.

Intellihub® is the browser and app-based command center for your entire fleet. This is where you manage the workload agenda and see every bit of vehicle and driver activity.

- Real-Time Tracking
- Dispatch & Messaging
- Driver Scorecards, Alerts, & Notifications
- Maintenance & Fuel Management
- Seamless Integration Capabilities
- Reporting & Analysis

## FleetCam® - Smart Dash Cams

Put extra eyes on the road to assist your drivers and see what they see.

The all-in-one fleet vehicle camera system that helps improve driving habits with in-cab notifications and an integrated driver behavior coaching system.

- In-cab AI recognizes, detects, and alerts drivers of dangers before an incident happens - falling asleep, following too close, crossing over the line, etc.
- Up to 8 cameras to see what your drivers see and more. Captured and stored in HD to view and download on demand.
- In addition to live stream abilities, triggered events are automatically uploaded for quick access by fleet managers.

## ELDs | Routing | Field Management | Mobile Apps

All of your fleet needs in one place, seamlessly integrated in a single platform.

- Field Warrior - ELDs, DVRs, dispatching, navigation, custom digital forms, signature capture, and more!
- Route Matrix - helps you build cost-effective routes with little effort by automatically optimizing your stops. Save hours of planning, travel time, and fuel.
- Monarch - Built for fleet managers on the go. Your entire fleet and real-time updates in an app.
- All-in-One Platform - Designed to help you manage all aspects of fleet and field operations in a single pane of glass.
